

## **CMCS Online Safety Information**

As we have to rely on technology now even more than before for education, CMCS continues to prioritize the security and online safety of our students and staff. Please review the following information:

- CMCS utilizes the Waiting Room feature in Zoom to ensure virtual classes are protected and include only the intended students and participants.
- All classroom Zoom meetings are password protected. Please do not share Meeting IDs or passwords with others.
- We kindly ask that parents do NOT join or speak during Zoom meetings. We ask that you treat these sessions just as if they were occurring in our classrooms, and thus respect the privacy and maintain the confidentiality of the learning environment. Please give your child space/independence during those meetings as you would if they were in school.
- In response to claims of encryption, Zoom has responded well and strengthened its security.
- Because devices are not being used on the school's WiFi, we cannot be liable for any network that is entered illegally because it wasn't WPA2 protected. Almost all of our families have protection and encryption if you use large companies, such as Spectrum or Frontier.
- While students are not on our campus, we are not able to monitor online activity. Parents, please monitor the online activity of your children.
